# Are you paying the lowest price for your prescriptions?

Good news — we've got an easy way to find out.

## Use the Comprehensive Formulary to find lower-cost medications.

The Comprehensive Formulary makes it easy to find more affordable alternatives to FDA-approved medications. Simply log into [highmark.com/bcbswny](https://highmark.com/bcbswny) and scroll down to the **Prescription Coverage** section. From there, you can select the link for **Drug List** to open the formulary and search for any drug by name or category. Once you find your medication, check which pricing tier your prescription falls into — and if any lower-cost options are available.

## Consult your physician about preferred products or generic alternatives.

Generic or preferred medications typically cost a lot less than brand name or non-preferred counterparts. By using the formulary to learn which medications are approved to treat your condition, you can ask your doctor about cost-saving alternatives. Don't forget, your doctor knows what's best and may have specific reasons for prescribing certain medications.

## Questions? Don't hesitate to ask.

If you need help understanding the Comprehensive Formulary, call the number on the back of your ID card. You can also refer to your benefit booklet for information on medication tiers.
